

WHAT IS THE KOIS CENTER?

The Kois Center is a didactic and clinical program, featuring a comprehensive curriculum of nine courses. At the Kois Center, we strive to use the latest advances in esthetics, implants and restorative dentistry. Adjunct courses are also offered, which complement the Kois Center curriculum. All courses are based upon Dr. John C. Kois' mission statement:

"Enabling motivated dentists to achieve extraordinary levels, expanding knowledge and application skills in restorative dentistry."

Approved Continuing Education Credits include:

- AGD Pace Certified
- ADA CERP
- AACD PESA Member

WHAT MAKES THE KOIS CENTER UNIQUE?

The curriculum is taught almost exclusively by Dr. John C. Kois, using the Kois Research Center research. The Kois Center is the only continuing education program in the country conducting and publishing independent research. Every course is updated each year based on new scientific evidence. Some of our courses, like Biomechanics I & II, are based solely on our own research.

The Kois Center uses the best and most current technology to facilitate and support the learning environment including: computer animation, live video demonstrations, video cameras with simultaneous multiple input feeds, high tech dental office and laboratory interface with our conference room.

We have small class sizes of up to 37 students, as well as guidance and assistance during courses from Mentors and the Clinical Instructor. These individuals provide a supportive and highly interactive learning environment both before, during, and after the course. Once students complete the Kois Center curriculum they become a Graduate of the Center and are invited to attend the Annual Symposium. The Annual Symposium is an opportunity to network with Kois Center Graduates and their families, in addition to learning about the latest updates to the curriculum.

The Kois Center is a self-funded learning center. We do not accept sponsorship funding and are not swayed by the agenda or message of sponsors.

WHO ATTENDS THE KOIS CENTER?

Attendance is open to all dental professionals including: general dentists, specialists, laboratory technicians, and dental staff. Those who find the Kois Center to be the best "fit" for them often have the following characteristics in common:

- Value being at the forefront of solid, scientific evidence
- Appreciate a small, personal classroom atmosphere where participation is encouraged
- Desire to participate and collaborate with other dental professionals
- Desire to become involved in providing more comprehensive care for patients
- Strive to be excellent
